

Belt/Wheel Grinding

Multi-Purpose Crowning Attachment

The multi-purpose design can be used with standard grinding wheels for grinding, belt grinding with a rubber contact wheel, and tilted for slack-belt polishing. The compact design makes installation quick and simple since there are no separate control cabinets.

A conveniently located modern touch screen interface panel makes operation very user-friendly, while it tracks the linear position of the grinder to assure accurate and repeatable crowning. (Also offered without the crowing option)

Complete Unit
Simple To Install On Standard Engine Lathes

Features:

- C100mm (4") Max Crown on Dia.
- 10Hp Grinder Motor
- Accepts 350mm (12") Dia. Wheels
- Accepts 75mmx2m Belts
- Touch Screen Panel
- Compact Design
- Easy Installation
- Rear or Front Mounting
- 220V, 380V, 460V 3ph
- Adjustable Speed (6,000 Rpm Max)
- Taper and Profile Compensation
- Metric and English Units
- Encoder
