

Calendar Builders

Three Roll Builders

These quality three roll builders are made in Europe. They offer the benefits of small overbuild and ease of operation.

Additional features available such as automatic diameter control, which allows presetting the build diameter, and automatic polythene/paper take-up, speed up and simplify roll building even more.

A typical printing roller will take approximately a minute to build using this machine (this time includes putting a roller into the machine and taking it out).

FEATURES:

- Modern and rugged industrial design
- Good overbuild control
- Easy to operate
- No build lines typical with strip building
- Custom sizes available
- Safety sensors

Models Available:

Customized to fit customer's requirements.
